## Recording at Dove Studio

September 2025

I offer all audio production services generally; mixing & mastering, production, spoken voice (podcasts and the like). I can provide original music/soundtracks if needed.

Drum kit [ $\frac{3}{4}$  size]. Bass & guitar amps, Roland piano, Korg synths, percussion. Various mics.

I master recordings using Izotope's 'Ozone Advanced' mastering suite.

Your final recording (wav & mp3) can be burnt to CD, or via a USB stick (suggest you bring a USB stick to all sessions) or emailed.

Payment by cash or by bank transfer. One hour charged for non-appearance of booked session. Recordings released after payment. A contract is drawn up.

Standard hourly rate is £44. For multi-session jobs we will sit down beforehand and discuss the whole thing; get an idea of how many sessions are involved and plan them out. No extra charges... use of all instruments, kit etc. I can play piano/keys, guitars/bass guitar/drums... as required.

SEE SOUNDCLOUD 'Recording at Dove Studio' <https://soundcloud.com/dove-studio>

Everything recorded is backed up in case you want to access files later...

i.e. the multi-track & stereo mix files. I usually keep these for decades! (I recently supplied a client with the mixes of songs she had recorded [and subsequently lost] from 1995!).
